TO WHOM IT MAY CONCERN

This is to certify that **Ms. Shriya Shukla (Roll No. - 2230201)** of **Kalinga Institute of Industrial Technology, Bhubaneswar** has worked under my supervision from **6 May 2024 to 10 July 2024**. She worked on ***Semiconductor Defect Prediction using Machine and Deep Learning Techniques***

Shriya applied several machine learning algorithms on the UCI-Secom dataset. First, she carried out data pre-processing using dimensionality reduction techniques such as PCA/Kernel methods. She then utilized neural networks to enhance the model's performance and accuracy. She also explored various research papers and implemented them to refine the model's accuracy.

She is sharp, perceptive, and quick during this whole time with a high aptitude for understanding the mathematical underpinning behind these models. She is a sincere, interactive, intelligent, hardworking student and a team player.

I wish her all success in her future endeavors.

Yours sincerely,

(Akhilesh Kumar)
